

EB2 Series

The NEC EB2 series relays are low power consumption, low magnetic interference surface mount relays. Their compact lightweight design makes them ideal for use in telecommunication equipment. This series complies with FCC Part 68 1500V surge voltage requirements.

The EB2 series is available in 2 form C (DPDT) contact arrangements for all latch types. The EB2 series also offers a minimum foot print design as well as a tape and reel packaging system.
